HEARING LOSS AND THE BLUETOOTH ERA

HEARING AIDS AND THEIR MODERN BLUE TOOTH ACCESSORIES

Wednesday, November 15 at 11 am

YMCA Lobby – FREE and open to the community

Sound connects us to our world and hearing technology is advancing as fast as phones and computers. Yvonne Feffer, Doctor of Audiology at Connect Hearing in Libertyville, will share her expertise about the many ways in which new technology can benefit those with hearing loss.

Insight

Untreated hearing loss has been linked to dementia and hastening the effects of Alzheimer's Disease.

Understanding

Understand how hearing loss impacts everyday life not just for the person with the hearing loss, but also their families, coworkers and friends.

Education

- Find out about hearing loss help

- Learn about the advancement of hearing aids
- Learn about new technologies
